

**C**OPLE is in the very north eastern part of the community forest. In this area, where there is good quality agricultural land, the main aim will be to improve and plant more hedgerows. The Forest Team will also work with local people on other projects such as Rights of Way improvements and a village nature reserve

**SHORT CUT**

**A** Follow the headland path, with a hedgerow on your right, past the waymark post at point A, proceed straight ahead until you meet a stile at the next field junction.

**B** Proceed over the stile to your right, carry on straight ahead through an avenue of trees, on your right is a hedgerow and to your left a small plantation of beech. Follow this troilined track, which is gated at its northern end.

**C** Proceed through the gateway between two fenced off fields to the waymark post at point D.

**D** Proceed directly ahead through a gateway, to your left is a pond with trees growing around its edge, keep to the right of this. You will pass Wood End Farmhouse which is on your right, follow the field-edge path to your right, eventually coming out at a signpost junction adjacent to Wood End Farm.

**E** Carry on straight ahead along a narrow road with wide verges and hedges either side. This lane - "Water End Lane" - eventually comes out at Cople. If you wish to rejoin the Cople Circular Walk at point 14, this is possible by turning left at the signposted bridleway before you meet the first cottages on your left on Water End Lane.

**KEY**

-  Main Route
-  Short Cut
-  Winter Alternative
-  Existing Rights of Way

65 cms = 1km  
4 inches = 1 mile
